

## PERMOX CB630

A stainless steel (AISI316) coarse bubble diffuser with 1" connection thread

Weight per piece: 1,7kg

Sustainable and maintenance friendly, self-cleaning design:

as a result of a sufficient large air buffer in the top of the diffuser and the deflector at the bottom, the entry of sedimentation and clogging is prevented.

By different levels and different sizes of air holes, an optimized aeration efficiency is ensured for the different air volume flows of the large range for the PERMOX CB630 (0-90 Nm<sup>3</sup>/h)

Low pressure resistance ( $\leq 15$ mbar)
